

MARCUS HALE

Software Architect

Lead · Chicago, United States
marcus.hale@example.com

PROFILE

Lead Software Architect with 15 years of experience shaping .NET platforms and guiding teams through pragmatic modernization. Specializes in decomposing legacy services, defining technical strategy, and sequencing architecture changes around delivery risk. Combines hands-on C#, F#, and SQL expertise with mentoring, architecture governance, and close collaboration across engineering, product, and operations.

CORE SKILLS

Service decomposition · Technical strategy · Legacy modernization · Distributed systems · C# and F# · SQL and data architecture · API design · Cloud architecture · Observability · Technical mentoring · Delivery leadership

EXPERIENCE

Northstar Commerce Systems | Software Architect

06/2021 - Present

- Set technical direction for decomposing a mature monolithic billing platform into independently deployable .NET services, while maintaining backward compatibility for existing clients.
- Introduced architecture decision records, service ownership standards, and quarterly technical planning, improving alignment across five engineering teams.
- Mentored senior and aspiring engineers through design reviews and delivery coaching; established a lightweight architecture forum used across the technology group.

Tech: C#, F#, SQL Server, ASP.NET Core, Azure, Kubernetes

Lakefront Logistics | Principal Software Engineer

03/2016 - 05/2021

- Led an incremental modernization program that moved core order workflows from tightly coupled Windows services to versioned APIs and background workers.
- Partnered with product and operations leaders to sequence releases around business risk, reducing large change windows and improving rollback confidence.
- Defined observability patterns with structured logging, tracing, and service-level indicators for newly separated components.

Tech: C#, F#, SQL Server, RabbitMQ, Docker, Prometheus

CivicWorks Software | Senior Software Engineer

07/2011 - 02/2016

- Delivered customer and internal applications in a large .NET codebase, including shared libraries and automated deployment workflows.
- Supported onboarding and facilitated peer learning sessions on testing, database design, and maintainable service boundaries.

Tech: C#, ASP.NET MVC, SQL, T-SQL, TeamCity

EDUCATION

University of Illinois Chicago

BSc, Computer Science · 2006-2010
