

MAYA CHEN

Mobile Engineer

Intern · Melbourne, Australia
maya.chen.mobile@example.com

PROFILE

Recent computer science graduate building dependable mobile features with a practical offline-first mindset. Comfortable developing in Swift, Kotlin and Python, writing automated tests, and investigating sync edge cases. Brings internship experience delivering small iOS improvements from requirements through review, with clear documentation and a collaborative approach to product and engineering work.

CORE SKILLS

Swift · Kotlin · Python · iOS development · SwiftUI · Offline synchronization · Core Data · Automated testing · XCTest · REST APIs · Git · CI/CD

EXPERIENCE

Harbour Labs | Mobile Engineering Intern

02/2026 - 08/2026

- Built an offline-first task list flow in SwiftUI, including local persistence, retry handling and visible sync status.
- Added unit and UI tests for conflict resolution and intermittent connectivity, covering the main sync paths before release.
- Documented sync state transitions and supported a staged rollout with product and backend engineers.

Tech: Swift, SwiftUI, Core Data, XCTest, GitHub Actions

Monash Digital Studio | Software Engineering Intern

07/2025 - 12/2025

- Implemented Kotlin features for a campus events prototype, including cached event data and an empty-state experience for offline use.
- Created a small Python test utility that generated repeatable API fixtures, making mobile integration testing easier during development.

Tech: Kotlin, Python, REST APIs, SQLite, Jira

Monash University | Mobile Developer, Capstone Project

03/2025 - 06/2025

- Developed an iOS field-notes prototype for a four-person team, prioritising local capture before network upload.
- Presented a tested synchronization design and concise technical handover to the project sponsor.

Tech: Swift, UIKit, Core Data, XCTest, Git

EDUCATION

Monash University

Bachelor of Computer Science, Software Development · 2022-2026
