

MAYA ELLISON

Frontend Engineer

Junior · Manchester, UK
maya.ellison@example.com

PROFILE

Early-career frontend engineer building accessible, responsive web products for education. Experienced with React, TypeScript and design-system components, with a practical focus on semantic HTML, keyboard support, performance budgets and maintainable delivery. Comfortable working with designers, content teams and backend engineers to turn learner needs into clear, reliable interfaces.

CORE SKILLS

React · TypeScript · JavaScript · HTML/CSS · Design systems · Web accessibility · Frontend performance · Testing and tooling

EXPERIENCE

LearnSpring | Junior Frontend Engineer

02/2025 - Present

- Built reusable lesson, progress and feedback components for a React learning platform, improving consistency across three product areas.
- Introduced accessible form patterns and keyboard-navigation checks; resolved recurring WCAG issues in the learner onboarding flow.
- Added route-level code splitting and image loading improvements, reducing the median mobile page load by approximately 18%.

Tech: React, TypeScript, Storybook, CSS Modules, Jest, Playwright

BrightPath Education | Frontend Developer Intern

06/2024 - 01/2025

- Implemented responsive dashboard views from Figma designs and connected them to REST API data states.
- Added automated accessibility checks to pull requests and documented component usage for the small product team.

Tech: JavaScript, React, HTML, CSS, axe-core

Northwest Digital Lab | Web Development Trainee

09/2023 - 05/2024

- Created a responsive study-planning prototype and tested it with university volunteers, incorporating feedback on navigation and readability.

Tech: HTML, CSS, JavaScript, Git

EDUCATION

Manchester Metropolitan University

BSc, Web and User Experience Design · 2021-2024
